## PROFILE

Frontend Developer with 1.5 years of experience in building responsive and user-friendly websites. Skilled in React.js, JavaScript, HTML5, and CSS3, with expertise in using Bootstrap and Tailwind CSS for efficient and flexible styling. Proficient in converting Figma designs into interactive and functional web pages. Adept at writing clean, maintainable code and ensuring websites are optimized for performance across various devices and browsers. Strong focus on cross-browser compatibility and mobile-first design. Continuously learning and staying updated with the latest web development trends and best practices to improve workflow and project outcomes

## WORK EXPERIENCE

### Software Engineer

Sequoia Applied Technologies, Chennai June/2023-Present

- Develop and Maintain User Interfaces:** Create responsive and visually appealing web pages using React.js, JavaScript, HTML, and CSS, ensuring cross-browser compatibility and smooth user experiences.
- Collaborate with Design and Backend Teams:** Work closely with designers to translate Figma mockups into interactive websites, and integrate with RESTful APIs for dynamic data handling.
- Optimize Performance and Code Quality:** Write clean, reusable code and apply web optimization techniques to ensure fast, efficient, and scalable websites across different devices and platforms.

## PROJECTS

### ATNDNZ

- Role:** Frontend Developer and UI/UX designing for mobile app and web application
- Technologies Used:** React.js, JavaScript, HTML, CSS, Bootstrap, Swagger, Figma
- Project Description:** Developed the web interface for an Office Attendance Management System that allows users to mark their entry and exit via a mobile app. Managers can monitor and manage attendance data through a responsive web portal. The system features real-time attendance tracking, report generation, and data visualization to simplify attendance management in office settings

### PROFILE BUILDER

- Role:** Frontend Developer and UI/UX design (Web Application)
- Technologies Used:** JavaScript, HTML, CSS, Bootstrap, Figma
- Project Description:** The Profile Builder is a web application for creating customized resumes in PDF and Word formats. Users can enter their professional experience, skills, and education through an intuitive interface. The app generates personalized templates that allow layout and style customization. Using python-docx and pdfkit, users can easily download polished resumes, streamlining the profile creation process for managers and HR professionals.
